

## Néo-assyrien

La liste reprise ici suit celle de R. Borger, *Mesopotamisches Zeichenlexikon*, Münster, 2003. J'ai également tiré grand profit de la *List of Neo-Assyrian Cuneiform Signs. A practical and critical guide to the Unicode blocks «Cuneiform» and «Cuneiform Numbers» of Unicode Standard Version 5.0* (<http://www.sumerisches-glossar.de/download/SignListNeoAssyrian.pdf>), compilée par M. Studt (liste révisée de D. Bachmann), avec introduction critique par Borger.

Les signes sans point de code (xxx) sont des signes rares, qui n'ont pas reçu de point de code dans le *Standard Unicode Cuneiform 5.0*, ou des signes utilisés par le syllabaire hittite.
